› On/Off button

› Pediatric mode button

› SHOCK button

CHARACTERISTICS

• REALISTIC SCENARIOS

Recreate a wide variety of customizable emergency situations, providing an immersive and realistic training environment.

• PADS

Reusable training pads. They can be used up to 50 times depending on the conditions of use.

• MULTILINGUAL

Available in multiple languages, selectable from the mobile app. Enables effective and accessible training for everyone.

• BATTERIES

New batteries will provide at least 65 hours of continuous operation under normal conditions.

• COMPLETE SIMULATION OF THE R100

It replicates the actual use of the Reanibex 100 in all its modes: automatic and semi-automatic. It also includes other messages related to the device's status changes: low battery, errors, etc.

• LIGHT

Light weight with custom carrying bag.

REANIBEX TRAINER APP

Our app offers an advanced and realistic training experience, ideal for anyone interested in improving their CPR skills. With the Reanibex 100 TRAINER app, available for Android and IOS, the instructor can define the settings for the scenarios and control the training sessions in real time.

- Automatic/semi-automatic mode
- Pediatric mode on/off
- Metronome on/off
- Adult/pediatric CPR sequence
- Pads placed/not placed
- In-range/out-of-range compressions
- Volume control
- 5 selectable and configurable scenarios
- Language selection
- Device status change
