

ROLL-IN STRETCHER COMPACT

Compact

ROLL-IN STRETCHER

Lightweight, industrial-strength materials combined with intelligent design for safe mobility and transportation. It provides the durability and flexibility you'll appreciate.

Roll-in Stretcher Compact

Key features

- Lightweight, industrial-grade construction utilizing aluminum, polymers, and composite materials
 - Mechanical roll-in stretcher design focused on reliability, simplicity, and long service life
 - Compact and space-efficient architecture, suitable for ambulances with limited interior space
 - Safe and stable loading and unloading operation optimized for routine EMS use
- Gas-spring assisted backrest adjustment (0–75°) enabling controlled and ergonomic patient positioning
 - Four extendable telescopic carrying handles for flexible handling in confined or challenging environments
 - Equipped with four fully rotational (360° swivel) wheels, with the option to lock two wheels for secure positioning during handling and transport.
