

# INCUBATOR STRETCHER

## Incubator Stretcher

Available For : Feria (monoblock)- Sarir (detachable)  
Valens Rx6 – Both Monoblock And Detachable Versions - Compact Stretcher

### Key features

- Customer-Specific Integration Incubator mounting is engineered based on each customer's operational needs, vehicle type, and clinical workflow.
- Multi-Stretcher Compatibility Compatible with selected ROYAX stretcher platforms including monoblock and detachable systems, offering maximum fleet flexibility.
- Secure Fixation System Robust mechanical locking and fixation points ensure stable incubator positioning during transport, braking, and vehicle movement.
- Optimized Weight Distribution Structural design ensures balanced load distribution to maintain stretcher stability, maneuverability, and safety.
- Safe Neonatal Transport Designed to meet the strict safety and comfort requirements of neonatal and NICU transport environments.
- Quick Installation & Removal Incubator systems can be installed or removed efficiently without compromising structural integrity or operational readiness.

Product Model	Product Code	Technical Specifications					
		Length (cm)	Width (cm)	Height (cm)	Max. Loading Height (cm)	Weight (kg)	Loading Capacity (kg)
